关于我们

每一次的技术创新都源自一线的体验，每一回的攻关都瞄准行业的难点。在智能化、数字化、高效节能、集中排水以及绿色生产方面优势明显。

Every technological innovation all come from the frontline experience, and every tackling problem is aimed at the difficulties of the industry. It has obvious advantages in polishing precision, high efficiency and energy saving, centralized drainage and green production.

About Us

01 综合配套实力

纳德创建于 2005 年，是一家能同时提供陶瓷抛光整线装备、磨块与金刚石制品、超洁亮纳米化工材料及综合承包服务的企业。

Comprehensive Supporting

Founded in 2005, Nade is an enterprise that can provide ceramic polishing complete line equipment, abrasive blocks and diamond products, super clean nano chemical material and comprehensive contracting services at the same time.

Nade 纳德
您的标准 纳德智造

02 专业认知、源自一线

依据十数年在海内外 200 多条抛光整线的承包生产经历，对意大利各种品牌抛光线进行了长期、深度的分析和考察，对标欧洲标准制定纳德陶瓷抛光线的智能制造要求；控制系统符合国家 GB5226.1-2008 机械电气安全标准、国际电工组织 IEC60204-1:2005 电气安全标准以及欧盟 CE 认证标准。

Professional Knowledge

Based on more than ten years of contracting production experience for more than 200 complete polishing lines at home and abroad, we have conducted long-term and in-depth analysis and inspection of various Italian brand polishing lines, and integrated European standards into the development of big slab polishing line; The control system conforms to the national GB5226.1-2008 mandatory standard, IEC60204-1:2005 electrical safety standard and the EU CE certification standard.

LAPPATO ABRASIVE 弹性磨块

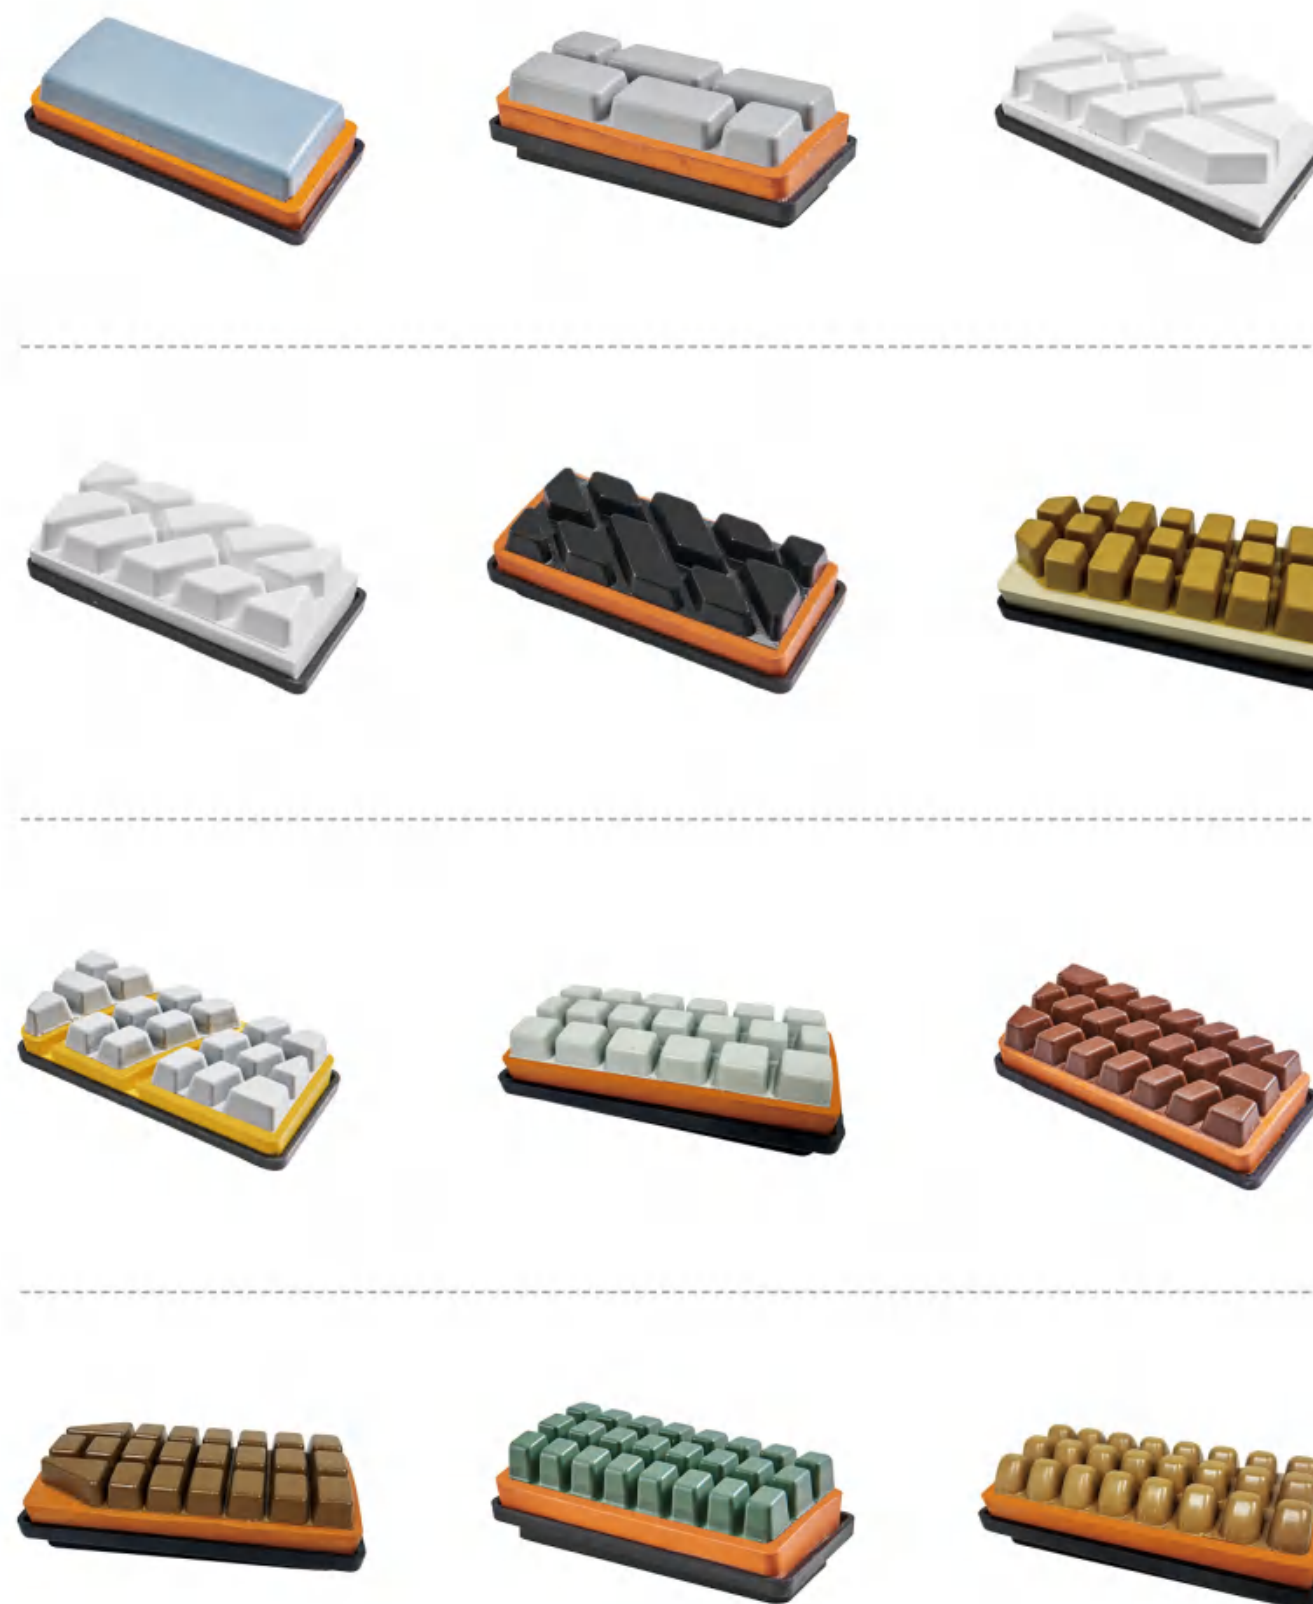

抛釉磨块又称弹性磨块。主要对各种有釉陶瓷砖、大板及岩板等进行砖面的仿形全抛光或半抛光加工。具有仿形好、磨削力强、抛光光泽度高、无磨痕及使用寿命长等特点。具有多种规格和粒度号以满足不同的生产标准和工艺需求。

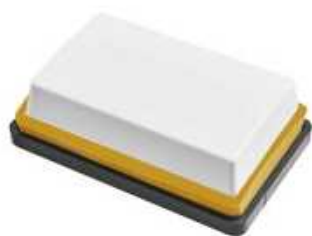

Lappato abrasive is a kind of Glaze polishing abrasive which is also called elastic abrasive. It's used for all kinds of ceramic glazed tiles, large slabs and Sintered Slabs, full or semi-polished processing of the tile surface. It has the characteristics of good profiling, strong grinding power, high polishing gloss, no wear marks and long service life. With a variety of specifications and grit size numbers to meet different production standards and process requirements.

HIGH GLOSSY POLISHING SERIES 高光抛釉类

HIGH GLOSSY POLISHING SERIES 高光抛釉类

产品规格 Product Specifications

型号 Model	L(MM)	齿高 H (MM)	粒度范围 GR	胶度 Shore
L140	T1	10 ~ 15	46# ~ 8000#	25,33,40,45,50,65,75
L100	T5	10 ~ 15	46# ~ 8000#	25,33,40,45,50,65,75

可根据客户需求定制 Tailored To Your Needs.

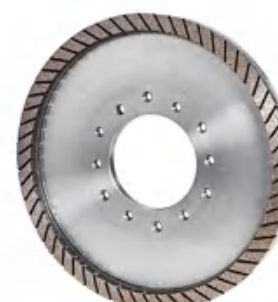

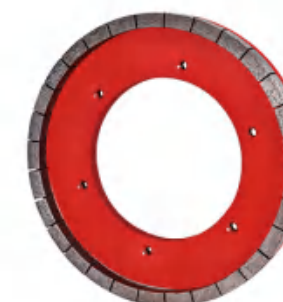

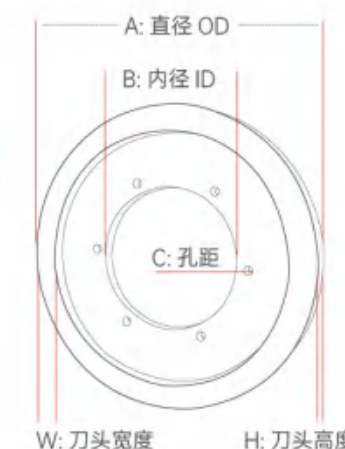

MATT & SOFT POLISHING SERIES 哑光柔抛类

产品规格 Product Specifications

类型 Type	长度 L(MM)	型号 Model	齿高 H (MM)	粒度范围 GR	备注 Remark
纤维磨块 Fiber Abrasive	140	T1	25	60# ~ 10000#	5P、6P、7P、9P
纤维刷 Fiber Brush	170	T2	28 ~ 30	24# ~ 3000#	
橡胶刷 Rubber Brush	140	T1	20	180# ~ 800#	粗细型 Coarse & Fine Filaments
橡胶刷 Rubber Brush	140	T1	22	120# ~ 800#	粗丝 Coarse Filaments

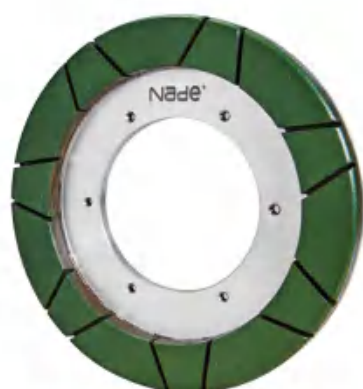

可根据客户需求定制 Tailored To Your Needs.

SQUARING WHEEL SERIES
磨边轮系列高效磨边修角
持久耐磨更省心EFFICIENT SQUARING & CHAMFERING;
DURABLE & WORRY-FREEDIAMOND SQUARING WHEEL

	240-25*15	连续式 Continuous		
	200-25*15	连续式 Continuous		

可根据客户需求定制 Tailored To Your Needs.

DIAMOND CHAMFERING WHEEL
金刚倒角轮RESIN BOND CHAMFERING WHEEL
树脂金刚倒角轮POLISHING PAD FOR CHAMFERING
倒角抛片SILICON CARBIDE CHAMFERING WHEEL
碳化硅倒角轮

产品规格 Product Specifications

名称 Description	外径 * 刀头宽 * 刀头高 OD*W*H (MM)	齿形 Teeth Shape	粒度范围 GR	备注 Remark
金刚倒角轮 Diamond Chamfering Wheel	150*10*10	连续式 Continuous	80#/100#	干磨 / 水磨 Dry/Wet
	150*9*14	焊接式 Segmented		
树脂金刚倒角轮 Resin Bond Chamfering Wheel	130*30*22(铝基体 Aluminium body) 130*40*22(卡板式 Plastic body)	连续式 Continuous	100#/120#/150#/180# /240#/320#/400#	干磨 / 水磨 Dry/Wet
碳化硅倒角轮 Silicon Carbide Chamfering Wheel	120*50*28	连续式 Continuous	120#/150#/240# /320#/400#	干磨 / 水磨 Dry/Wet
倒角抛片 Polishing Pad For Chamfering	125*3、125*4	连续式 Continuous		干磨 / 水磨 Dry/Wet

可根据客户需求定制 Tailored To Your Needs.

DIAMOND ABRASIVE

金刚石磨块

主要用于替代传统氧化镁结合碳化硅磨块对砖坯表面进行粗、中磨。独特的原料配方，先进的生产工艺，确保了金刚石磨块在磨削效率、磨削效果、稳定性、经济性、可靠性方面的完美表现。

It is mainly used for coarse and medium polishing of tiles surface instead of traditional magnesia bonded silicon carbide abrasive. The unique raw material formula and advanced production technology ensure the perfect performance of diamond abrasive in polishing efficiency, grinding effect, stability, economy and reliability.

DIAMOND ROLLER

金刚石滚刀

金刚石滚刀是目前陶瓷加工最常用的工具之一，主要用于陶瓷砖坯抛光前的刮平定厚。本公司采用最新配方技术和先进的生产工艺，所生产的金刚石滚刀具有锋利度好、寿命长，使用能耗低、工作噪音小、质量稳定、加工效果好等特点。

Diamond calibrating roller is one of the most commonly used tool in ceramic processing, mainly used in ceramic tile surface pacifying and adjusting thickness before polishing. The company using the latest technology formula and advanced production technology, the production of diamond cutter has good sharpness, long service life, low energy consumption, low noise, stable quality, good processing effect, etc.
